CAREER SUMMARY

Motivated Computer Science and Business Systems undergraduate with hands-on experience in machine learning, full-stack development, and automation. Proficient in Java, Python, and data-driven engineering with a strong foundation in Data Structures & Algorithms. Skilled at building scalable, cloud-ready software solutions and bridging technical execution with business requirements. Seeking a Software Engineer role to deliver innovative, high-impact solutions in a dynamic, growth-oriented environment.

EDUCATION

Canara Engineering College	2023 – 2027
B.E. in Computer Science and Business Systems	CGPA: 7.15

TECHNICAL SKILLS

Languages: Java, Python, C++, R

Tools & Technologies: Git, Docker, MySQL, Microsoft Power BI, VS Code

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Streamlit, YOLOv8

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability

PROJECTS

Personal Expense Anomaly Detector

Python — Scikit-learn — Streamlit — Pandas

- Engineered an ML-powered web application using Isolation Forest algorithm to detect anomalous spending patterns with 90%+ accuracy on synthetic financial datasets.
- Deployed on Streamlit Cloud with interactive dashboards and real-time anomaly visualization; published on GitHub.

Object Detection Using Floor Map

Python — YOLOv8 — Streamlit — OpenCV

- Developed a real-time object detection system integrated with floor map visualization using YOLOv8 for accurate spatial object tracking and indoor navigation support.
- Built an interactive Streamlit interface allowing users to upload floor plans and dynamically visualize detected object positions.

Automated News Summarizer with Email Delivery

Python — NLP — SMTP — Relevance AI

- Engineered an end-to-end automated pipeline to scrape, process, and summarize news articles using NLP techniques and a no-code agentic AI built with Relevance AI.
- Implemented SMTP-based email automation to deliver personalized, concise news summaries, significantly reducing manual reading effort.

CERTIFICATIONS

- | | |
|---|------------|
| • IBM – Agentic AI: From Learner to Builder | IBM |
| • Salesforce – Agentblazer Champion Certification | Salesforce |
| • Introduction to Cybersecurity | Cisco |
| • Spoken Tutorial Training: Python, C, Git | |
| • Intro to AI and CS | Google |

ACHIEVEMENTS & PARTICIPATION

- Participated in NITTE Udbhava, a national-level technical hackathon, enhancing problem-solving under time constraints.
- Competed in a State-Level Hackathon at Yenepoya Institute of Technology, collaborating to design and present a solution within 24 hours.
